

Senior Engineer

Date Posted: 6th July 2017

Location: London

Position type: Permanent

Salary: Negotiable

We require an ambitious Senior Structural Engineer to work in our London offices to deliver varied and challenging projects for public and private sector clients. Preferably, the candidate must be a chartered engineer (MIStructE or MICE).

We have been appointed to many framework contracts with universities, Network Rail, Housing Associations and local authorities including; University College London, London School of Economics, Kingston University, Medway, Newham, Sandwell, Shepway, Ashford, Kent and Barking and Dagenham Stockport, Kirklees, Manchester City Councils. The Group has a turnover of £14 million, employs over 140 staff and has offices in Stockport, London and Warrington.

An excellent salary package is available for the right candidate.

The role will be very much 'hands on' and the candidate must have design experience in all forms of structural materials. The candidate will be responsible for managing all aspects of the successful delivery of their projects. This will include structural design, client liaison and supervision of junior staff.

Projects delivered from our London office vary from university buildings, hospitals, schools, new high rise apartments, affordable housing and bespoke luxury housing. The candidate can be expected to work on small challenging projects and major projects up to £30m in value.

Our London office is based in Westminster and is less than 5 minutes' walk to the Houses of Parliament. It is close to Pimlico, St James's Park and Westminster underground stations.
